

**Name:** Candidate C  
**Role:** Machine Learning Engineer  
**Experience:** 3 Years  
**Location:** India

---

### Professional Summary

Machine Learning Engineer with experience in building, training, and deploying ML models using Python. Strong knowledge of data preprocessing, model evaluation, and applied deep learning techniques.

---

### Technical Skills

- Programming: Python
  - ML/DL: Machine Learning, Deep Learning
  - Libraries: Scikit-learn, TensorFlow (basic)
  - Data: Pandas, NumPy
  - Databases: SQL
  - Tools: Git, Jupyter Notebook
- 

### Work Experience

#### Machine Learning Engineer

DataVision Labs | 2021 – 2024

- Built ML models for classification and prediction tasks
  - Performed data preprocessing and feature engineering
  - Evaluated model performance using standard metrics
  - Collaborated with data scientists and backend teams
- 

### Education

B.Tech in Artificial Intelligence

XYZ Institute of Technology | 2018 – 2021

---

### Projects

#### Candidate Recommendation Engine

- Developed ML-based candidate ranking logic
  - Improved recommendation accuracy using feature tuning
-

## **Certifications**

- Machine Learning with Python – IBM
